

## **ENROLLMENT CHANGES**

Any changes in a student's enrollment plans can affect his or her eligibility for financial aid. The amount of aid available for students increases as the amount of student enrollment increases.

Any decrease in a student's number of hours, post awarding (via failing grades, administrative or student dropping of a course) will negatively affect that student's SAP, whether it be against the student's GPA or count against the 67% Pace requirement.
